

Group Programs

Marsh Exploration

Grades 1-12 & Adults

Why are wetlands so important? What is a watershed? Learn about the importance of wetlands and how they are natural filter. Explore the marsh and understand this important habitat, watersheds, and the area where we live. Participants will explore the marsh, learn about wetlands and their importance, study the stream and its creatures, understand the history of the area, and much more! (Activities may vary based on age.) This program may introduce topics in the following Pennsylvania Department of Education Academic Standards for Environment and Ecology categories: 4.1, 4.5, 4.6, & 4.7. (Wear water boots or shoes!)

Wetland Senses

Grades Preschool - K

This program encourages children to fully experience the marsh by using their senses while learning and discovering. Four senses (no tasting) will be incorporated into fun, educational activities to get children exploring, touching, viewing, playing games, and more in a hands-on experiential way. This program is designed for Pre-school or Kindergarten groups, but can be adapted to first and second grade. This program may introduce topics in the following Pennsylvania Department of Education Academic Standards for Environment and Ecology categories: 4.1, 4.6

Integrated Pest Management

Grades 3-8

This program is designed to introduce elementary school students to the concepts of Integrated Pest Management. Students will understand different types of pests and identify different methods to control specific pests. Students will also explore Millbrook Marsh, learn about the marsh as a natural filter, and understand how invasive species impact this precious ecosystem. This program is for third graders or higher. This program may introduce topics in the following Pennsylvania Department of Education Academic Standards for Environment and Ecology categories: 4.1, 4.5, 4.6

Insect Safari

Grades Preschool - 5

This program guides children to explore the marsh on an insect search and offers activities that teach about bug basics, special adaptations, insect eyes, and more about the bug world! (Wear water boots or shoes!)

Beginning Birdwatching

Grades 1-5

Learn about birds and their characteristics, while exploring Millbrook Marsh. Also, begin learning the art of birdwatching with our pre-set course, before practicing on live birds! A great way to start out and to begin learning about local birds.
